Education

Ho Chi Minh City University of Technology (HCMUT – VNU-HCM) Ho Chi Minh City, Vietnam
Bachelor of Science in Computer Science (Sophomore) *Aug 2025 – Expected Jun 2028*

- **GPA:** 3.4 / 4.0 **Honors & Awards:** OISP Academic Merit Scholarship (Semester HK251)
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Systems, Computer Networks, Discrete Mathematics, Software Engineering Principles.

Technical Skills

Languages: C++, C#, TypeScript, JavaScript, Python, SQL, HTML5/CSS3

Frontend Development: React 19, TypeScript, TailwindCSS v4, Feature-Sliced Design (FSD), Interactive SVG Canvas, Component Testing

Backend & Cloud: ASP.NET Core (.NET 10), Clean Architecture, CQRS (MediatR), SignalR (WebSockets), RESTful APIs, Azure SQL Database, Azure Blob Storage

AI/LLM & DevOps: OpenAI API, Gemini API, Prompt Engineering; Docker Compose, Caddy Reverse Proxy, Git, GitHub Actions, Vitest, xUnit, Linux/Bash, VS Code

Certifications & Languages: IELTS Academic 6.5 (Professional Working English), Vietnamese (Native)

Technical Projects

OVC MOVE – Real-time Large-Scale Race Management Platform *June 2026 – Present*
Full-stack Software Engineer & System Architect ***Production:*** *move.oispvolunteerclub.com*

- **Full-stack Architecture:** Engineered a full-stack real-time race management platform using **React 19** and **TailwindCSS v4** organized under **Feature-Sliced Design (FSD)** architecture, backed by an **ASP.NET Core (.NET 10)** API using **Clean Architecture** and **CQRS (MediatR)**.
- **Interactive SVG Coordinate Engine:** Developed a zero-dependency interactive SVG canvas supporting continuous zoom (0.2× – 8.0×), panning, boundary clamping, and drag-and-drop station pin placement with precision persistence locking.
- **Real-time Sync & Anti-Cheat:** Integrated **SignalR WebSocket Hub** enabling instant, zero-reload race map synchronization for multiple concurrent competing teams; implemented server-side **Role Masking** to conceal hidden checkpoints from client payloads.
- **Production DevOps & Security:** Containerized frontend and backend via **Docker Compose** fronted by **Caddy Reverse Proxy** on Linux VPS, automating SSL/TLS certificate provisioning and CORS enforcement with **Azure SQL** and multi-container **Azure Blob Storage**.
- **Quality Assurance & Testing:** Built a multi-tiered test suite with **420+ automated tests** across **Vitest** (257 component, boundary, and scenario tests with 100% pass rate) and **xUnit** for robust CQRS handler verification.

uWallet – Personal Expense Tracker & Smart Financial Planner *Dec 2025 – Jan 2026*
Sole Developer *React, TypeScript, REST API, Chart.js, Local/Cloud Storage*

- Engineered a responsive personal financial management web application allowing users to record multi-category transactions, schedule recurring budgets, and visualize spending distributions through interactive analytical charts.
- Implemented proactive budget alert algorithms that dynamically analyze monthly spending velocity and dispatch automated warning notifications prior to exceeding custom threshold limits.
- Structured a modular component architecture with TypeScript and RESTful endpoints, ensuring high client-side responsiveness, clean separation of concerns, and reliable transactional persistence.

Leadership & Extracurricular Activities

OISP Volunteer Club (OVC) – HCMUT (VNU-HCM) Ho Chi Minh City, Vietnam
Club President & Core Member of Digital Solutions Team *Oct 2026 – Present*

- Elected as **Club President** directing a community of 300+ members across 100+ social initiatives (2,000+ beneficiaries), while actively driving the **Digital Solutions Team** to engineer practical software products that automate operations and solve community challenges.
